

# PROJECT MANAGEMENT

Omni Cable's solutions can help eliminate potential hidden costs!

## What is Project Management?

Coordination of wire and cable bill of materials for a project or job that requires specific services beyond standard supply and demand. Projects that require this type of service can range in size from \$50K to \$10M.

## When Do You Need Project Management Services?

You may need project management services when you have a large bill of materials, job site logistics and efficiencies, and when managing wire & cable is not your expertise.

## Omni Cable's Project Management Program

Omni Cable has been a market leader since its founding in 1977. With 12 locations nationwide and \$60M in inventory, we are an extension of your warehouse. Omni Cable has vast resources that provide world-class project management solutions for your large long-term projects.

## Why Do You Need Omni Cable's Project Management Services?

Did you know that hidden costs can range from 15% - 17% of your project costs? Omni Cable can help eliminate potential hidden costs to increase project profitability.

### Long Lead Times

Quick turn around of cut-to-length reels. With 12 locations nationwide & \$60M in inventory, we have what you need on hand for same-day shipping.

### Additional Shipping

Omni Cable consolidates shipments while still following a strict schedule and ships directly to the job site instead of the distributor.

### Damage

Omni Cable eliminates the risk of damage by not storing materials on the job site where they run the risk of being damaged.

### Pricing

You know your costs for product regardless of the fluctuation of copper. Material is purchased and stored off-site, and you are billed when material ships.

### Flexibility

Omni Cable can change or modify inventory and specifications as needed. We can adjust quantities throughout the project to reduce surplus material.

### Labor

Labor costs of moving storage are eliminated when Omni Cable schedules material to arrive as needed.

### Project Delays

Omni Cable manages the inventory so there is never material shortage. We also provide technical & engineering support and on-site assistance to help keep the project on track.

### Theft

Inventory that is stored on-site is at risk of theft. Omni Cable eliminated that risk by delivering your materials when you need them. No storage necessary!
