

An Authorized Genuine MCCB Source

MOLDED CASE CIRCUIT BREAKER (MCCB)

Why Purchase MCCBs from Omni Cable?

Availability, Accessibility, Traceability

Omni Cable has signed agreements with both Eaton and Schneider Electric to serve as an authorized genuine source of their Eaton® and Square D™ MCCBs in the Northeastern and Mid-Atlantic states.*

Availability

Omni Cable now sells Eaton® and Square D™ molded case circuit breakers (MCCBs) to electrical distributors, providing them with authorized, safe, and reliable MCCBs through a single source. Omni Cable is an extension of your warehouse with an extensive inventory of MCCBs and accessories. MCCBs are available 24 hours a day, 365 days a year and shipped the same day.

Accessibility

It is all about safety when purchasing an **AUTHENTIC** product from an **AUTHORIZED** source. Unauthorized sources rely on deception and aggressive pricing. Identifying counterfeit products is extremely difficult. They are made with inferior materials, inaccurate manufacturing processes, and without functional or safety testing.

Traceability

An authentic product is only sold through an authorized source who can provide full **TRACEABILITY**. Purchasing products from unauthorized sources significantly increases your risk of receiving counterfeit, altered, tampered, or refurbished products. Unauthorized sources cannot provide traceability.

Don't expose your company to increased **RISK and LIABILITY** by purchasing suspect products from unauthorized sources. Your business reputation is on the line, so don't put your customers in an unsafe environment and expose your company to unnecessary liability. Products purchased through unautho-ri-zed sources do not carry the factory warranty which leaves the distribution channel open to liability.

**MCCBs from Omni Cable are available in the following Northeastern and Mid-Atlantic states: CT, DC, DE, MA, MD, ME, NH, NJ, NY, OH, PA, RI, VA, VT, and WV.*
